

Pitching in - helping out!

A proud, long-time member of the Alberta business community, with operations at Exshaw and Summit, Graymont, its shareholders and employees have established a \$100,000 Graymont People Fund, through the Canadian Red Cross, to support the communities and individuals directly impacted by the recent devastating floods here in central and southern Alberta.

While working to ensure the safety of our employees and get our plants up and running again, we've also been reaching out to our neighbours in the surrounding communities, pitching in with manpower and equipment to help clean up and get people back into their homes.

Albertans are rightly known for their exceptional spirit and resilience. At Graymont, we have the utmost confidence in the future of the province, its people and its economy - and we remain committed to responsibly meeting your needs for quality lime and stone products.

We're with you Alberta!
